

LIQUID LATEX | LIQUID LATEX

NAME	SPECIFICATIONS	USES	CODE
Thin Latex Pink		2 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27002
Medium Latex Pink		2 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27102
Thick Latex Pink		2 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27202
Thin Latex White		2 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26002
Medium Latex White		2 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26102
Thick Latex White		2 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26202

Thin Latex Pink		5 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27005
Medium Latex Pink		5 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27105
Thick Latex Pink		5 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27205
Thin Latex White		5 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26005
Medium Latex White		5 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26105
Thick Latex White		5 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26205
Medium Latex Pink		20 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27120

Thick Latex Pink		20 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.27220
Thin Latex White		20 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26020
Medium Latex White		20 L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26120
Thick Latex White		20L Container Latex moulding compound has very low shrinkage and fast-drying detail.	68.26220
